20. Entries will be accepted in **order of fully paid entry receipt**. When the maximum entry is reached a reserve list will be started.
21. Timing will be via an electronic system to the previous tenth of a second. Competitors are free to start in their own time after the all-clear signal has been received from the time keeper. This signal will be demonstrated during the first run of the day.

Timing will start as the front wheels cross the timing line, and stop when the front wheels cross the finish line. Competitors are then required to cease all forwards motion within the box after the finish line.

Should the timing system not work then the organisers will use the manual timing system or stopwatches with the same process as above.

- Taking an incorrect route on any course	Maximum time
- Completing a course in a time exceeding maximum time	Maximum time
- Not stopping in the finish box	1 <sup>st</sup> time – Warning 2 <sup>nd</sup> time – 5 seconds Subsequent – 5 seconds

2<sup>nd</sup> time – Exclusion

The maximum time is the fastest time in class for that course, plus 30 seconds.

23. The event will contain 4 courses. The better two runs of three attempts at each course will count for results. In the event of a tie, the fastest run on the first course will determine the tie, then the second fastest run on the first course, then the fastest run on the second course etc until the tie is resolved.

To be classed as a finisher, a competitor must start at least two runs at all courses bar one. If there are 4 courses, a finisher must attempt at least 2 runs of each of the first 3.

If the event runs late, then the organisers reserve the right to shorten the event either by:

- Cancelling the 4<sup>th</sup> course
- To re-run the 3<sup>rd</sup> course in full without allowing a 2<sup>nd</sup> walk of the course

**24.** The course will be depicted by numbered cones of 75cm height (NCR Ch19 App. 1 2.7). Course designs will be in the competitors pack issued with the final instructions. It will be the competitor's responsibility to print these and bring them with them.

**25.** The STOP signal may be displayed because of an obstruction on the course, whether this is an object or person. **A competitor must stop immediately at the marshal point on deployment of the STOP signal**, and a re-run will be allowed. A competitor will wait at the marshal location until given instruction from the marshal. The STOP signal will be by deployment of a red flag from each marshalling location indicated on the course layouts.

**26.** As part of the AutoSOLO we will be requiring competitors to marshal the course throughout the day. There will be an activity schedule sent out with the finals stating when you will be marshalling, driving, or resting. All competitors **MUST** bring their own hi-vis reflective tabard which has to always be worn when out marshalling. When it is the competitors turn to marshal, they will need to go to the event HQ to be allocated a marshal location. Other persons present with competitors are welcome to marshal alongside, however they must also sign on, either online prior to the event or see an official on the day of the event.

Failure to marshal on each course may result in the competitor not counting towards the final classifications. The only exception is for the competitors who sit next to juniors who will not be required to marshal.

We ask for your support in this initiative by following some simple examples to help contribute to our environmental impact during this event:

- Do not leave anything at the venues or en-route. Please take it home to recycle or dispose of correctly.
- If your vehicle does start to experience problems which could affect the environment, this includes leaks from the vehicle, please contact a member of the organising team.

We also aim to do as much electronically as possible including the below:
